

EMISSIONS SERVICES

LEADING THE WAY IN ADAPTING TO THE CHANGING LANDSCAPE OF EMISSIONS SERVICES, REPORTING, AND REGULATORY COMPLIANCE.

360's experienced Emissions Services and Well Integrity team provides industry with infield analysis, monitoring, and data collection services to ensure assets are in compliance with the ever-changing regulatory obligations, and tailors solutions to meet client-specific ESG standards and commitments.

360's team of emissions services and integrity specialists use the latest technology to monitor gas migration, fugitive emissions, and any other integrity issues that may cause emissions to escape into the atmosphere. The team supports clients with meeting regulatory obligations and achieving their specific ESG commitments.

EMISSIONS AND INTEGRITY SERVICES

- Well integrity testing, monitoring, and sampling
- Gas migration testing (in-soil and wellhead)
- In-soil and wellhead gas collection
- SCVF testing and repair
