

RADIUS DECOMMISSIONING SERVICES

Specializing in Turnkey Facility Decommissioning, Pipeline & Well Abandonment Projects

A strategic joint venture between **360 Engineering & Environmental Consulting Ltd.** and **Round 2 Services**, the Radius Decommissioning team plans and executes with excellence on infrastructure decommissioning projects. We seamlessly integrate and collaborate with client project teams and provide turnkey execution strategies by deploying industry leading project managers, wellsite supervisors, and field resources. Our team of in-house experts apply a risk-based methodology developed over thousands of projects, to take each site from initial review to completion and turnover documentation.

Radius has managed facility decommissioning and pipeline abandonment projects for multiple sectors and industries across North America including oil and gas, commercial development, and renewable energy. Our capital-efficient, highly communicative, and adaptable project execution team is actively engaged in industry, resulting in consolidation of local and regional best practices. Radius operates with a COR-recognized HSE Management System and a Quality Management Program, using automated systems to enhance quality control and optimize project turnaround deliverables.

Our Services

- Development and execution of decommissioning and reclamation projects including facility drain down and demolition
- Equipment transfer management, sales, disposal, and salvage
- ABSA protocols and disposition documentation and reporting
- Pigging and purging of pipeline systems
- Pipeline removal or abandonment in place with ICT technology
- Experienced decommissioning-focused wellsite supervisors
- D056/PNG001 notifications and One-Stop/IRIS amendments
- Landowner and stakeholder communication management
- Accurate and defensible cost estimates for suspension, abandonment, reclamation, and remediation requirements
